

Kiana Lesan Pezeshki

Software and AI Engineer | Full-Stack Engineer (.NET / C#)

Mississauga, Ontario • +1-226-606-9173 • Kiana.pezeshki@gmail.com • [linkedin.com/in/kiana-pezeshki](https://www.linkedin.com/in/kiana-pezeshki) • github.com/kianapz

Full-Stack Software Engineer with 5+ years of hands-on experience building scalable SaaS platforms using C#, .NET, microservices, JavaScript, TypeScript, with a master's degree in Computer Science and publications in Artificial Intelligence and machine learning.

Skills

Programming Languages: C#, Python, SQL, JavaScript, TypeScript, Java, R

Backend & Full-Stack: ASP.NET Core, .NET, MVC, Web API, LINQ, Node.js, RESTful APIs, Hangfire, Microservices, WPF, SOLID and Clean code principles, Serilog, Error Tracking & Root Cause Investigation, Stimulsoft report designer

ORMs: Entity Framework Core, Dapper, SQLAlchemy

Frontend: Vue.js, React, Nuxt.js, Blazor, jQuery

Databases: SQL Server, MongoDB, Stored Procedures, Database Schema Modelling, JSON

Cloud & DevOps: Azure DevOps Pipelines (YAML), CI/CD, Docker, Kubernetes, SonarQube, Azure AKS, IIS Deployment, Windows Server Administration, Debugging & Diagnosis

Data Governance & Security: Data Governance principles, RBAC and secure API design, Logging, HIPAA / PII / PHI / least-privilege access awareness

Tools: Git/GitHub, Postman, JMeter, PowerShell, Jira, Trello, GitHub Copilot

ML & Data Science: Scikit-learn, TensorFlow, PyTorch, NLP, Feature Engineering, Outlier Detection, Clustering, SVM, Random Forest, Anomaly Detection, Statistical Analysis, GNNs, KANs, Hypergraphs

Data Processing & Viz: Pandas, NumPy, Matplotlib, Plotly, Dash, Folium, Power BI

Web & SEO: WordPress, Google Search Console, Google Analytics

Soft Skills: Leadership & mentorship, Collaboration, Critical thinking, Problem-solving, Time management

Experience

Software Engineer | Balanced Plus (Consulting Firm) | Mississauga, Ontario

Mar 2026 – Present

- Engaged directly with clients to gather requirements, understand business needs, and produce clear technical documentation and project quotes.
- Worked on multiple client-facing projects across different business domains and technical environments.
- Managed concurrent user access to shared entities by implementing row-level revision tracking, table locking, and a heartbeat API to ensure data integrity and prevent conflicts.
- Added multiple crons and automation using Hangfire.
- Implemented a configurable round-robin resource allocation system that dynamically cycles through resources based on frequency settings, with support for enabling/disabling resources and automatic queue rebalancing.
- Published PHP applications to remote servers via SSH, managing deployments safely across client environments.
- Debugged and resolved production issues through logging, error tracking, and root-cause analysis.
- Managed project workflow using Azure DevOps, including tickets, sprint planning, and backlog grooming.

Environment: C#, .NET, ASP.NET, Vue.js, TypeScript, React, Azure DevOps, SQL, SQL Server, PHP, REST APIs, SSH, Windows Server, IIS, Git, Agile, Postman

AI Trainer | Outlier | Remote, Canada

Nov 2025 – Present

- Evaluated and annotated LLM responses to improve accuracy, reasoning quality, and alignment. Provided structured feedback to support model improvement.

Research Assistant – Data Scientist | University of Windsor | Windsor, Ontario

May 2024 – Jun 2026

- Designed a Power BI dashboard for multi-modal public health surveillance using historical and real-time API data.
- Integrated real-time data via APIs and web crawling; automated processes to keep dashboards current.
- Applied machine learning methods on cross-domain datasets for pandemic pattern recognition.

Graduate Assistant | University of Windsor | Windsor, Ontario

May 2024 – Sep 2025

- Provided technical instruction to undergraduate students in Python programming.
- Managed and evaluated student performance on real-world industrial projects.

Full-Stack Engineer | RIRA Company | Tehran, Iran

Apr 2021 – Apr 2024

- Designed, developed, debugged, and maintained SaaS web applications including LMS, HRIS, and Ticketing platforms.
- Automated update processes using PowerShell, stored procedures, and Windows Services.
- Collaborated with DevOps to deploy across IIS servers; supported multiple client installations.
- Led projects and contributed to new-hire training programs for interns.
- Applied SOLID principles, API testing, unit testing, and dependency injection for maintainable, scalable code.

Environment: C#, .NET, ASP.NET, Vue.js, TypeScript, React, SQL, SQL Server, REST APIs, Windows Server, IIS, Git, Agile, Postman, JMeter

Key Projects

Navid – Multilingual LMS

- Deployed, maintained, and extended a multilingual LMS; embedded internal ticketing, integrated Adobe Connect, implemented secure APIs for external integrations and data export.
- Communicated with 80+ university representatives and IT managers for server management and deployments.

Data Dashboard for LMS Integration

- Identified the need for a centralized reporting solution, led the project, and unified data from 80 LMS servers across universities into a comprehensive reporting platform.
- Created custom authorization middleware, used CQRS, Mediator, and Hangfire for scalable background processing.

Freelance Web Developer & SEO Specialist | Contractor | Remote, Canada / Iran

Sep 2019 – Nov 2025

- Maintained long-term partnerships with 6+ clients; consistently delivered value resulting in repeat contracts and referrals.
- Planned and executed on-page and off-page SEO strategies achieving 150K+ impressions and 40% monthly growth.
- Improved performance, structure and UI/UX of websites through caching and Google Analytics / Microsoft Clarity insights.

Education

Master of Science in Computer Science – Artificial Intelligence Specialization | GPA: 95%

University of Windsor, Windsor, Ontario | May 2024 – Oct 2025

Thesis: A Goal-Driven Evolutionary Framework for the Team Formation Problem in Social Networks

Bachelor of Science in Computer Science – Software Engineering Specialization

Azad University – Tehran Central Branch, Tehran, Iran | Sep 2016 – Sep 2021

Publications

Haghighi S., Pezeshki K.L., Zadeh P.M. – A Novel Approach to Person-Job Fit Using Outlier Detection. 2024 11th Int. Conference on SNAMS, Gran Canaria, Spain, 2024.

Lesan Pezeshki K. et al. – A Multi-modal Data-Driven Dashboard for Enhanced Public Health Surveillance. Int. Conference on Innovations for Community Services, Springer, 2025.

Additional Training

- Google IT Automation with Python – Coursera
- IBM Data Science Specialization – Coursera
- Data Privacy, Security & Governance – University of Guelph, May 2025
- Learn Azure DevOps CI/CD Pipelines – In Progress (Udemy, 2025)
- Kubernetes for Developers – In Progress (Udemy, 2025)

Volunteering

- Science Fair Judge – Académie Ste-Cécile International School (ASCIS), Mar 2025
- Design of Emergency Unit Management Dashboard – Collaborated with medical professionals and software engineers to design and develop a dashboard integrated into a Hospital Information System (HIS). (Jun 2023 – Nov 2023)
